class `unitth.core.UnitTH`

Bases: `object`

UnitTH python interface

static run (*xml_report_dir*, *xml_report_filter*='TEST-', *html_report_path*='', *generate_exec_time_graphs*=True, *html_report_dir*='report.th', *initial_java_heap_size*=None, *maximum_java_heap_size*=None)

Use UnitTH to generate a test history report

Parameters

- **xml_report_dir** (`str`) – Parent directory of XML reports of individual builds to generate a history report of
- **xml_report_filter** (`str`, optional) – Starts-with filter for individual reports with *xml_report_dir* that should be included in the history report. Set *xml_report_filter* to '' to include all files/subdirectories in the history report.
- **html_report_path** (`str`, optional) – Directory of HTML reports of individual builds (relative to XML directories of individual builds)
- **generate_exec_time_graphs** (`bool`, optional) – Whether execution time graphs shall be generated
- **html_report_dir** (`str`, optional) – directory to store generated HTML history report
- **initial_java_heap_size** (`str`, optional) – initial Java heap size
- **maximum_java_heap_size** (`str`, optional) – maximum Java heap size

1.1.3 Module contents

Indices and tables

- `genindex`
- `modindex`
- `search`
